

# K!DS ON THE MOVE

## Candy Corn Relays

Objective: The first team to get all of their candy corn into the bowl wins!

Materials Needed: Candy corn, spoons, cones, bowls or small buckets

Directions: First, set up your relay courses (one for each team) using cones that each team will need to maneuver through. You could also add other items they need to step over, etc. On the starting end of each course, place a bowl with candy corns (equal amount in each bowl) and one spoon. At the other end of each course, place an empty bowl.

Break the club up into smaller teams (no more than 5 or so on each team so no one is left standing for too long). Have the teams decide their order. The first child in line scoops a piece of candy corn out of the bowl and maneuvers through the course to dump it into the empty bowl. Then they run the spoon back and give it to the next person in line. The next person takes another scoop of candy corn and maneuvers through the course to dump it into the bowl. Continue until all of the candy corn has been scooped from one container to the other!

### How to Change it Up

-Make it a race against the clock! Which team can scoop the most candy corn from one container to the other before the timer rings?

-Try mixing up the types of movements the kids use to get through the course. Can they tip toe? Heel walk?
